

# Aqualok Infuse

The Aqualok Infuse features a fantastic infuser lid that allows you to add and lock in your favourite fruits or vegetables to your daily drinking water. Just like our standard [Aqualok model](#), the Aqualok Infuse is made from the durable translucent Tritan™ plastic and also features a secure-lock lid to prevent any unwanted spillages. There are enlarged branding areas on two sides of the bottle and also around the lid, which is a popular branding area to print with bespoke names via our Individual Naming service.
